"Be that change you want to see in the world."

Summary

2nd year systems engineering student with solid knowledge in several programming languages, focused on BackEnd. My passion for programming and problem solving has led me to acquire technical skills and practical experience in software development.

I am proactive and self-taught, always looking to learn new technologies and improve my skills. I have strong teamwork and excellent communication skills along with technical skills in Linux, which allows me to collaborate effectively with other IT professionals.

Skills

Back-End	FastAPI, Express, SQLite, MongoDB
Front-End	HTML5, CSS, JS, Next.JS, React
Programming	Python, TypeScript, CSharp, LaTeX
Languages	English (Intermediate), Spanish (Native)
Extras	Excel, PowerPoint, Prompt Engineering, Docker, Git, Linux
